

**IN THE CLAIMS**

**Please amend the claims as follows:**

1. (Original) A note board apparatus, comprising:  
a support board;  
a notepad assembly attached to said support board; and  
a clip element connected to said support board along an edge of said support board, said clip element configured to releasably connect said support board to an object.
2. (Original) The note board apparatus defined in claim 1, wherein said notepad assembly is adhesively attached to said support board.
3. (Original) The note board apparatus defined in claim 1, wherein said clip element is releasably connected to said support board.
4. (Original) The note board apparatus of claim 1, wherein said notepad assembly includes a base sheet and a plurality of writing sheets, said writing sheets connected on one edge to said base sheet.
5. (Original) The note board apparatus of claim 4, wherein said writing sheets are releasably connected to said base sheet.
6. (Original) The note board apparatus of claim 4, wherein said writing sheets are connected to said base sheet with a binding comb.
7. (Original) The note board apparatus of claim 1, further comprising a writing instrument releasably connected to said support board.

8. (Original) The note board apparatus of claim 7, wherein said writing instrument is connected to said support board with a hook and loop connector.
9. (Original) A note board apparatus, comprising:
  - a support board;
  - a base sheet adhesively connected to said support board;
  - a plurality of writing sheets connected to said base sheet along at least one edge of said plurality of writing sheets;
  - a clip element connected to said support board along an edge of said support board and configured to releasably connect said support board to an object.
10. (Original) The note board apparatus of claim 9, further comprising a writing instrument releasably connected to said support board.
11. (Original) The note board apparatus of claim 10, wherein said writing instrument is connected to said support board with a hook and loop connector.
12. (Original) The note board apparatus of claim 9, wherein said each of said plurality of writing sheets is releasably connected to said support board.
13. (Original) The note board apparatus of claim 9, wherein said plurality of writing sheets is connected to said base sheet with a binding comb.
14. (Original) A note taking organizational kit, comprising:
  - at least one note board apparatus including a support board, a notepad assembly attached to said support board, and a clip element connected to said

support board along an edge of said support board, said clip element configured to releasably connect said support board to an object; and

at least one storage unit configured to receive said at least one note board apparatus within its interior.

15. (Original) The note taking organizational kit of claim 14, wherein said at least one note board apparatus includes a writing instrument releasably connected to said support board.
16. (Original) The note taking organizational kit of claim 14, further comprising at least one writing instrument releasably connected to said storage unit.
17. (Original) The note taking organizational kit of claim 14, wherein said storage unit includes a box construction.
18. (Currently Amended) A note taking organizational kit, comprising:  
at least two note board apparatus including a support board, a notepad assembly attached to said support board, and a clip element connected to said support board along an edge of said support board, said clip element configured to releasably connect said support board to an object;  
at least one storage unit configured to receive said at least two note board apparatus within its interior; and  
~~The note taking organizational kit of claim 14, further comprising~~  
at least one divider received within said storage unit and ~~at least two note board apparatus~~, said at least one divider configured to separate said at least two note board apparatus.

19. (Original) The note taking organizational kit of claim 18, wherein said at least one divider includes an extended edge that extends upwardly above a top edge of said storage unit and a label connected to said extended edge.
20. (Original) The note taking organizational kit of claim 14, wherein said notepad assembly includes a support board, a base sheet adhesively connected to said support board, a plurality of writing sheets connected to said base sheet along one edge and a clip connected to said support board and configured to connect said support board to an object.
21. (New) A note taking organizational kit, comprising:
  - at least two note board apparatus including a support board, a notepad assembly attached to said support board, and a clip element connected to said support board along an edge of said support board, said clip element configured to releasably connect said support board to an object; and
  - at least one storage unit configured to receive said at least two note board apparatus within its interior.
